Java

```java
class Solution {
    public int[] findArray(int[] pref) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number[]} pref
 * @return {number[]}
 */
var findArray = function(pref) {

};
```

C++

```cpp
class Solution {
public:
    vector<int> findArray(vector<int>& pref) {

    }
};
```

C#

```csharp
public class Solution {
    public int[] FindArray(int[] pref) {

    }
}
```
